

MULTI-FUNCTION POLES

HUB.Pole

The HUB.Pole is a beautifully simple and internationally recognised Multi Functional Pole System that offers greater flexibility and greater value to this product category.

The HUB.Pole is a modular system that starts as an elegant and inexpensive column which, via the addition of the unique HUB Universal Mounting System (UMS), becomes a fully capable, MFP System, that can accommodate all current and future urban pole mounted accessories.

The HUB.Pole accommodates Lighting, Traffic signals, Signage, Banner, CCTV, Solar and Telecommunication accessories and can be custom modified to suite the needs of your project.

The HUB.Pole Multi Functional Pole System combines a multitude of street pole functions onto a single, beautifully designed structural urban element.

The HUB.Pole system is a fully modular system that can be adapted to the needs of any modern city, both now and in the future. It is fully flexible in terms of:

- Pole Height
- Pole Diameter
- Accessories accommodated immediately
- Accessories accommodated in the future
- Ability to customise the aesthetics to suit the character of each city

SYSTEM

The heart of the HUB.Pole system is the UMS, or Universal Mounting System.

The HUB UMS is a patented and easy to install mounting hub which gives the system its multi functionality. This represents a distinct advancement away from the traditional track based system and the inherent flaws associated with this design approach.

The HUB UMS has allowed HUB to provide a more cost effective, more functional, more flexible and more universal solution to those seeking the distinct advantage offered by this type of public domain infrastructure.

The HUB UMS is only applied when needed and can be added or removed at any time.

The HUB UMS accommodates Lighting, Traffic, Signage and Telecommunication accessories. The HUB UMS is a structurally capable and easy to install element that provides maximum flexibility in terms of the broad range of accessories available, their mounting height and their orientation.

ACCESSORIES

The HUB.Pole system is designed to accommodate the complete range of pole mounted accessories typically found in the modern public domain. In addition, the HUB.Pole can be modified to accommodate an even greater range of accessories that may be required now, or in the future.

Please contact us to discuss your specific requirements and we would be happy to work with you to find the solution you are after.

VARIATIONS

The HUB.Pole can be customised to ensure it becomes a unique expression of your project.

The HUB.Pole can provide a strong opportunity for any Authority or Council seeking to create a unique sense of place in any public development or City.

Key elements of the system that allow an opportunity towards this end include feature lighting, base cladding, finishes and light outreaches.
