Art Projects

Brickpit Ring Australia, Sydney

The Brickpit Ring was a design & construct contract.

The contractor, CA&I, engaged HUB to design and supply the modular aluminium panel system that formed both the inner and outer walls of the structure.

HUB worked closely with the architect, Durbach Block and the team at SOPA to resolve this simple, elegant and visually consistent solution.

Some would say that panel system is the most beautiful part of the entire structure.....!

CLIENT
Sydney Olympic Park Authority

HUB ROLE
The Brickpit Ring was a design & construct contract.
HUB was engaged to design and supply the modular aluminium panel system that formed both the inner and outer walls of the structure.
