

## Central Park Seat Sydney

Central Park is described by Frasers, the developer, as “the missing piece of the puzzle that completes Sydney’s colourful inner-city landscape”. HUB Street Equipment was invited by Frasers to contribute to this vision. Taking Ateliers Jean Nouvel concept for a floating blade seat to echo the thrill of the Sky Garden, cantilevered 20 stories overhead. HUB refined the concept, detailed designed, prototyped and fabricated the unique stainless steel seat. Located in the central sunken courtyard, the seats offer refuge and a place for people to meet in a space that connects high end retail and food outlets to the surrounding park and open spaces.
