### Lane Cove Plaza Sydney

Lane Cove shopping centre is experiencing a revitalisation as new developments continue in and around Lane Cove Plaza. The new custom designed shelter system for diners responds to this change and was based on a concept by the BN Group. The shelter is highly adaptable to changing environmental conditions and patronage demand. In concert with the existing mature trees, the delicate leaf pattern in the 6m wide glass roof creates a dappled light and shade effect, the operable roof and wall screens control sun/shade and wind, and the planter boxes with vines introduce visual interest, scent and delineate space. The otherwise heavy steel structure is softened with the use of hardwood timber cladding and detailing; further homage to the existing trees.

CLIENT  
Lane Cove Council

HUB ROLE  
Design and supply custom shelter system
