Australia

Sydney Football Stadium

The Sydney Football Stadium (SFS) has seen some of Australia's biggest sporting and entertainment events. The forecourt area was upgraded to coincide with capital works upgrades to the stadium itself. HUB worked closely with Webb Australia to adapt the HUB.Multi-Function Poles to meet the specific lighting and functional requirements of this project. The design intent was to create a high impact entrance concourse to reflect the significance of the venue. HUB.Multi-Function Poles and furniture, with bronze statues of some of Australia's biggest sporting heroes, combine to successfully achieve this design vision.
